

Preface	i
One Mathematician's Tour from Biology into Computing and Back to Life	1
<i>Tom Head</i>	
An Overview of Computation in Cellular Automata	7
<i>Wim Hordijk</i>	
On DNA Computing	17
<i>R. Rama</i>	
On the Computational Aspects of Splicing Operation	31
<i>L. Jeganathan</i>	
A Glimpse of Membrane Computing	49
<i>Kamala Krithivasan</i>	
Peptide Computing: A Survey	63
<i>M. Sakthi Balan, Helmut Jürgensen and Kamala Krithivasan</i>	
An Introduction to Evolutionary Computation	77
<i>Wim Hordijk</i>	
From Molecular Computing to Modelling with Conformons and Computing by Observation	85
<i>Pierluigi Frisco</i>	
An Overview of Recent Results in Contextual Grammars for MCS Formalisms	103
<i>K. Lakshmanan</i>	
Watson-Crick L Systems	113
<i>K.G. Subramanian</i>	
Network of Evolutionary Processors, Past, Present and Future	119
<i>Ashish Choudhary</i>	
Tissue-Like P Systems Communicating by Request*	143
<i>Erzsébet Csuha-J-Varjú, Gheorghe Păun and György Vaszil</i>	
Array-Rewriting P systems with Conditional Communication	155
<i>S. Hemalatha, K.S. Dersanambika, K.G. Subramanian and C. Sri Hari Nagore</i>	

Descriptional Complexity of h-alternating Finite Automata	161
<i>J.Kavitha and G.Sethuraman</i>	
On the Efficiency of a Variant of P Systems with Mobile Membranes	171
<i>S.N. Krishna</i>	
An Infinite Hierarchy for Some Variants of P Systems	179
<i>S.N. Krishna and R. Rama</i>	
Tissue P Systems with Leftmost Derivation	187
<i>Madhu Mutyam and Kamala Krithivasan</i>	
Hexagonal Array Splicing Systems	197
<i>D.G. Thomas, M.H. Begam and N.G. David</i>	
- A Note on Molecular Computing algorithms for finding the Shortest Path with Forbidden Pairs	209
<i>R. Ramkumar, P. Shrivatsav and S. Krishna Kumar</i>	
A Note on Peptide Computing Solution for the NP-Complete Edge Coloring Problem	215
<i>R. Rahul and Suneeth Reddy</i>	
A note on DNA and Peptide Computing: Knapsack Problem	221
<i>B. Naveen Kumar, Anshu Bhatia and Sourav Chatterjee</i>	
Author Index	225
